

Carbon Offset information

Bootham School appreciates the educational value of travel and school excursions, and also promotes a responsible outlook towards the protection of the environment. With both ideals in mind Bootham will send a donation for educational visits students make, when travelling within the UK, as a carbon offset. We offer the list of websites below as carbon-offsetting organisations (recommended by *Which*) to give you the option of reducing your carbon footprint on trips outside the UK. For a coach journey it could be as little as £2, or for a 10-hour return flight, as little as £20, so it's well worth it!

www.climatecare.org - Climate Care. (Efficient stoves in the developing world and rainforest reforestation schemes)

www.bvco.org.uk - Blue Ventures Carbon Offset. (Development projects in Madagascar)

www.puretrust.org.uk - PURE. The Clean Planet Trust. (Kyoto-compliant and energy efficiency projects in India, China and Brazil)

www.carbonbalanced.org – World Land Trust – (conservation work including tree-planting)

**Please tick this box if you plan to offset your international journey.
